Q5 How did you first learn about EasyBuild?

Answered: 94 Skipped: 0

4th EasyBuild User Survey (2020)

ANSWER CHOICES	RESPONSES	
someone told me about EasyBuild	32.98%	31
I saw a presentation on EasyBuild	13.83%	13
I read an article/paper on EasyBuild	6.38%	6
I heard about it on a podcast	0.00%	0
someone showed EasyBuild to me	4.26%	4
I stumbled onto the EasyBuild website	2.13%	2
it was mentioned on social media (Twitter, ...)	1.06%	1
I read a post mentioning EasyBuild on a mailing list	2.13%	2
EasyBuild was already in use when I started	24.47%	23
I don't remember	5.32%	5
other (please specify)	7.45%	7
TOTAL		94

#	OTHER (PLEASE SPECIFY)	DATE
1	I was looking for such a tool	1/21/2021 3:42 PM
2	came with openhpc	1/6/2021 5:53 AM
3	I was involved right from the start as it was developed in the centre I work for (VSC)	1/5/2021 5:39 PM
4	I met Kenneth in person	1/5/2021 12:52 PM
5	In the previous company we were considered to use it but instead used Spack	1/5/2021 12:38 PM
6	a very close colleague started developing easybuild	1/5/2021 12:26 PM
7	I found it when looking a software build framework	1/5/2021 12:19 PM

Q6 What is the main aspect of EasyBuild that convinced you to start using it?

Answered: 93 Skipped: 1

ANSWER CHOICES	RESPONSES	
the functionality provided by the EasyBuild framework (fully automated installations, module generation, ...)	55.91%	52
the set of supported software (easyblocks/easyconfigs)	10.75%	10
the EasyBuild community	4.30%	4
the integration with other tools (Lmod, GC3Pie, Docker/Singularity, FPM, ...)	2.15%	2
the fact that it doesn't need root privileges	1.08%	1
it was already being used	19.35%	18
other (please specify)	6.45%	6
TOTAL		93

#	OTHER (PLEASE SPECIFY)	DATE
1	All of the above except that it was already being used	1/21/2021 3:31 PM
2	all of the above (with relatively equal weights)	1/18/2021 1:48 PM
3	Have not used it much - to steep a learning curve	1/6/2021 5:53 AM
4	We agreed to use it as a common tool across sites.	1/5/2021 5:39 PM
5	all of the above	1/5/2021 12:52 PM
6	Our CTO was in favor of it instead of Spack	1/5/2021 12:38 PM

4th EasyBuild User Survey (2020)

#	OTHER (PLEASE SPECIFY)	DATE
1	difficult to find examples and all available options for extensions	1/22/2021 6:38 PM
2	no life cycle management to remove old software	1/22/2021 10:56 AM
3	missing easyconfigs for sw version / toolchain needed	1/13/2021 11:35 AM
4	the difficulty to port existing software to new toolchains, i.e. with all the needed/missing dependencies	1/13/2021 10:51 AM
5	Monolithic builds of bundles needing full rebuilds on extension failures	1/13/2021 10:50 AM
6	Easybuild is large and complex. Not easy to use. But I have no suggests for alternatives or improving	1/11/2021 10:39 PM
7	not using known interfaces (pip, cpan) as standard installation method for modules	1/7/2021 10:52 PM
8	Many many outdated easyconfigs	1/6/2021 3:54 AM
9	Python	1/6/2021 1:22 AM
10	EasyBuild has the potential to be a very flexible tool, but sometimes stupid decisions by people who only look at the use of the common toolchains as they are breaks that flexibility and requires tricky workarounds. I've had recipes breaking because of that and had to postpone the installation of several versions in the 4.x.y series because I couldn't figure out which change broke our recipes and installation.	1/5/2021 5:39 PM
11	No module dependency map tool that could help decommission modules	1/5/2021 12:39 PM
12	I kinda like the package file approach of SPACK more. It seems to me that it takes less effort from developers.	1/5/2021 12:38 PM

Q37 If a commercial support option would be available, would you consider purchasing it?(note: purely informative, no plans in that direction by the core EasyBuild team)

Answered: 93 Skipped: 1

ANSWER CHOICES	RESPONSES	
yes, definitely	3.23%	3
maybe	18.28%	17
I don't know, I would have to think about it	23.66%	22
probably not	26.88%	25
definitely not	10.75%	10
I don't really care about commercial support	17.20%	16
TOTAL		93

Q38 How would you rate the overall quality of EasyBuild?

Answered: 93 Skipped: 1

ANSWER CHOICES	RESPONSES	
Excellent, I'm not sure how I ever survived without it	48.39%	45
Great, it has helped me a lot	45.16%	42
OK, it has been fairly useful	4.30%	4
Could be better, hasn't been of much help to me	2.15%	2
Pretty bad, I'm worse off than I was before	0.00%	0
TOTAL		93

Q39 Do you have any suggestions for additional features?

Answered: 25 Skipped: 69

4th EasyBuild User Survey (2020)

#	RESPONSES	DATE
1	Support Python3 commands in the EasyConfig	1/22/2021 3:50 PM
2	add a way to "purge" old software with a life cycle management.	1/22/2021 10:56 AM
3	Troubleshooting resources and examples are a bit sparse. I am a new user, but it appears that without some external tooling (openssl, etc.) , easybuilds mostly don't work - this point needs better documentation and explanation.	1/21/2021 7:04 PM
4	Better documentation on how to do clean builds (eg inside containers) and how to automate builds that create modules as well as singularity containers in a single process	1/21/2021 3:55 PM
5	Our needs are really basic. If anything, a simpler version would be desired. ;-) We really want to use EB to install compilers, common libraries, and provide those to our developers who will then use those to build their own software. That's one case. Our other case, related but somewhat separate, is to install full applications for users, e.g., OpenFOAM, Trilinos, and to install interpreted languages like Python and R and assorted libraries that go with them (e.g., replicate a substantial subset of Anaconda distribution).	1/21/2021 3:31 PM
6	Integration with gitlab CI/CD.	1/18/2021 1:48 PM
7	No	1/15/2021 5:37 PM
8	Ability to create overriding easyconfigs via commandline (example: eb --override zlib) -> produces a local copy for that easyconfig that takes precedence and opens it in an editor. Would speed up small changes	1/13/2021 11:54 AM
9	I would like to see the extensions to things like python and perl use their respective package managers to manage packages rather than having to install each python/perl module independently and having to make sure that you install all dependencies. That's what the package managers were designed to do.	1/7/2021 10:52 PM
10	Parsable (json for example) output of dependencies list (given with --dry-run option). I would like to be able to install dependencies from rpm repo before building using EasyBuild.	1/6/2021 10:01 AM
11	You need to take a newbie and install it with OHPC and let them try to install things. It is just too complicated and the doco only seems good if everything works. I have basically given up as it is easier to build manually.	1/6/2021 5:53 AM
12	Some kind of simpler way of updating easyconfigs to use newer versions of target software.	1/6/2021 3:54 AM
13	Support for the pre-exascale systems in Europe.	1/5/2021 5:39 PM
14	Not for now.	1/5/2021 5:34 PM
15	A basic searchable text archive of the Slack discussions? A list of alternative github repositories (like https://github.com/ComputeCanada/easybuild-easyconfigs) in the (rare) cases when we don't find what we need in the official repo or just to get new ideas or tricks?	1/5/2021 4:12 PM
16	AD point 36 - sometimes I feel it's hard to find the error cause in the the way of debugging failed builds using easybuild log files. But I must admit, I don't have exact ideas how to do it better.. What I find as confusing is to see multiple occurrences stdout/stderr snippet in the logfile. Once as snippet, once full output. But the problem can be also between my chair and keyboard.	1/5/2021 1:40 PM
17	No, it lets me give a really fast turnaround for requests to install scientific packages.	1/5/2021 12:39 PM
18	Taking lessons learned from package managers and restructuring EB based on these experiences. However, I guess doing a bigger restructuring of EB is impossible at this stage.	1/5/2021 12:38 PM
19	- Color output in command line. - Progress bar (?) - When an error occur, output more than 300 characters and highlight these characters.	1/5/2021 12:25 PM
20	-) providing software trees to containers might become a use case exporting them via cvmfs might be an interesting option. -) not sure if there is a feature for this already, but how do sites handle multi architecture builds, all manually, custom jenkins?	1/5/2021 12:23 PM
21	Although the documentation is very complete, I often find it hard to find what I am looking for. The navigation bar on the left seem to me to have a huge number of very specific topics on the top level. I would like to see a bit more structure here. Often I have to ask on the mailing	1/5/2021 12:19 PM

4th EasyBuild User Survey (2020)

list for someone to point me to the right place. I think the problem is that searching turns up a lot of very low-level detail which sometimes swamps the more general information.

22	Wishful thinking: enforce easybuild as a law for any and all software developers out there to stop them reinventing the wheel	1/5/2021 12:09 PM
23	Regarding question 36: from a user perspective I don't really like the toolchain concept (and/or the module naming scheme). Users often don't have a clue what all this foss, GCC, GCCcore, etc means and which ones are compatible. It would be nice to have some kind of module naming scheme that makes this easier for users.	1/5/2021 11:59 AM
24	NA	1/5/2021 11:58 AM
25	There should be some metadata associated with which provide details on all system level dependencies and all architectures it has been tested on	1/5/2021 11:43 AM

Q40 Any additional comments?

Answered: 25 Skipped: 69

4th EasyBuild User Survey (2020)

#	RESPONSES	DATE
1	GREAT GREAT work with EB!	1/22/2021 3:50 PM
2	Many thanks!	1/22/2021 10:56 AM
3	I spent quite a bit of time attempting to get spack working but in the end, I found I spent more time messing with the system, than I would have if I just installed by hand. I am only just starting to look at easybuild, and to be honest, I am skeptical that a pythonic system will be productive given my experience with conda and spack, but I love the idea, and I hope that lmod integration will work. Having said that , I have installed easybuild four or five times in attempts to get a working system (e.g. one that allows a successful build of any tool) and so far I have not succeeded. openssl, for example, is a constant source of pain for efforts like this, and I am reluctant to install yet another version of openssl to appease easybuild. I have lots of questions which I will be bringing to the slack channel if I can't figure it out myself quickly.	1/21/2021 7:04 PM
4	Easybuild has been a tremendous resource for us, thank you so much for all the work you have put into it. I would like to contribute back, but I am not sure if my easyconfigs are up to standards. About this survey: somehow I couldn't select the options for some of the questions, so I put my answers in the "Other" field. Sorry about that, maybe it is an issue with the browser I am using. Thanks so much again!	1/21/2021 4:01 PM
5	The EB community has been great. We have organizational problems that have been our biggest barrier to making a commitment for full adoption. Sorry.	1/21/2021 3:31 PM
6	Thank you Kenneth, colleagues, contributors & collaborators.	1/21/2021 3:12 PM
7	Continuing in this way to help the software installation for the research/academic groups.	1/15/2021 5:37 PM
8	Really appreciate the community and the support via the Slack channel. It's been a great experience so far!	1/13/2021 3:48 PM
9	Your project saves a lot of man hours! Thank you.	1/13/2021 11:54 AM
10	keep up the good work!	1/13/2021 11:43 AM
11	Do you have a public roadmap for the framework itself and for easyconfigs?	1/13/2021 11:35 AM
12	My coffee consumption was considerably reduced when I started using eb ^^	1/6/2021 10:01 AM
13	EasyBuild is fantastic software and I don't know how I lived without it for so many years. There is still a bit of a steep learning curve for someone who is not a sysadmin, but the documentation and slack channel generally help. More tutorials would be helpful.	1/6/2021 3:54 AM
14	Plenty of comments, but I prefer to give those in private and with more explanation than I can provide here.	1/5/2021 5:39 PM
15	Continue the good work!	1/5/2021 5:34 PM
16	My responses are as an "end user" of EasyBuild, supporting a research group. We only build our own software, not a full HPC installation.	1/5/2021 5:14 PM
17	As rightly said in question 38., "I'm not sure how I ever survived without it". Many thanks!	1/5/2021 4:12 PM
18	thanks for great job.	1/5/2021 1:40 PM
19	I could only check one key feature but being able to install without privilege was critical for my use on a national compute cluster where I am not the admin.	1/5/2021 12:39 PM
20	You all are doing amazing work!	1/5/2021 12:25 PM
21	EasyBuild <3	1/5/2021 12:23 PM
22	The use of underscores in the name of variables in easyconfigs lacks consistency, e.g. "source_urls" and "sanity_check_paths", but "builddependencies" and "moduleclass". This always trips me up.	1/5/2021 12:19 PM
23	Your efforts are greatly underappreciated	1/5/2021 12:09 PM
24	Keep up the good work!	1/5/2021 12:08 PM
